zoomorphic benches; the bull roarer; use of the spear-thrower in inter-tribal games; whistling arrows; the mode of hair-cutting and body painting and ornamentation; the use of the *uluri*, or triangular bark pubic cover. The basic subsistence economies of the upper Xingú groups are almost identical, and there are strong similarities in social organization. In the latter sphere, the extended family, bilaterality with some patrilineal emphasis, patrilocality, and the men's cult appear general. The various tribes share many of the same ceremonies and co-participate in some. Insofar as is known, shamanism is much the same among all groups, and there is great similarity in religious beliefs and in mythology.

Trumaí History

Although the linguistic affiliations of the other upper Xingú peoples indicate their origins to be in the north, all available evidence points to a migration of the Trumaí from the southeast. Apparently this move did not occur very long ago, for the Trumaí themselves still tell of it. According to Trumaí tradition they came into their present habitat from a land far to the southeast. There, they say, there is still a Trumaí village. Informants varied as to whether or not the forebears of the Xingú Trumaí knew how to grow manioc. They were said to have had long hair like the Gê-speaking Suyá, to hunt tapir, and to tie up their penes. Matiwana, the old man of the Trumaí, claimed to remember when the Trumaí still treated their genitalia in this way. He also claimed that, when the Trumaí moved into the area and saw the Kamayurá and other tribes, they adopted the customs of hair-cutting and penis freedom. The tale, coupled with the fact that the Trumaí women did not use the true *uluri* pubic cover when von den Steinen first visited them,[5] suggests a fairly recent entry of the Trumaí into the upper Xingú area — perhaps no earlier than the nineteenth century — and due possibly to the pressures of white colonization.

Other evidence also argues for the recency of the present Trumaí habitat. The diffusion of culture traits in the upper Xingú is extensive, and in most cases it is difficult to determine the direction of borrowing. The Trumaí lexicon, however, shows heavy influence from their neighbors, especially the nearby Kamayurá. This influence manifests itself chiefly in names of plants and objects of material culture and in ceremonial songs. The songs of two major Trumaí ceremonies, both of which are practiced also by the Kamayurá, show a preponderance of Kamayurá words and phrases. Carib and Arawakan words are frequent in other songs. Also, the word for bull roarer in both Kamayurá and Trumaí is *uriuri*. The Trumaí words for such typically tropical forest domestica-

on a man's property, as did also, in the following order, his sister's son and his brother's son. Within the household, food was freely shared, and correspondingly, a co-resident could ask for a material object. These requests, however, were not always granted. A common excuse was to say that the object was promised to someone having a stronger claim. Despite these evasions, the patterns of gift-giving created a constant circulation of food and objects throughout the village.

Inheritance

Transmission of property was accomplished chiefly through trade and gift. There is no information on the disposal of the material possessions of the deceased. The only available data on inheritance concern the office of chief and the possession of certain songs sung at the *ole* (manioc) ceremony. The former was inherited patrilineally and will be discussed later. The ceremonial songs were inherited either through the mother's brother or the mother's father. Thus, old Matiwana would some day teach his *ole* songs to Amanatsin, his daughter's eldest son. Nitvary, another of the three men who knew *ole* songs, learned them from Jawaku's father, who was his mother's brother. Since cross-cousin marriage was practiced, Jawaku might marry Nitvary's sister, and their child would inherit the songs from Nitvary. In this way the *ole* songs returned to the direct patrilineal line every other generation.

In response to careful questioning, Quain was assured that these songs could be obtained only from the mother's brother and mother's father, and not from the father or the father's brother. The combination of this matrilineal trait and patrilineal elements is characteristic of the bilaterality in upper Xingú culture.

The Trade Game

The trade game was a mechanism of inter- and intra-community distribution. Even more importantly it provided a framework for social participation, leisure time relaxation, and general enjoyment. As such it was one of the few integrating factors in Trumaí society.

Afternoons, especially rainy afternoons, were dull times in the Trumaí village. In Quain's words, "These people are bored but don't realize it! Wrestling provides some diversion, but nothing quickens spirits more than a brisk trade game (*kawirxo*). All that is needed is for one of the men to stride through the village with a bundle of goods to trade and suggest a *kawirxo*. Shouts go up on all sides, everybody crowds into one of the houses, and the game is on. Enthusiasm is even greater when there are visitors in the village."

SP23 Trumai SP23

but continued at the same pace for about three weeks, and then slowly died down. It would be impossible to say on what day the *ole* ceremony ended.

When the *ole* cycle began it consisted of little except songs and dances. These were usually held shortly before daybreak and at night. About a week afterwards decorated posts were erected in the village center. These "*ole* posts" served as "shrines" to which food offerings were made. In the meantime, dancing and singing went on almost every day. On some days two or three *ole* songs and dances were performed; on others there was little activity.

The intensity of the ritual varied with the number of people in the village and according to whim. The participants changed from day to day, and some took part more often than others. Only certain men knew the songs and dances, and they served as leaders. Other men occasionally joined in and performed an accompanying role, while the women followed the dancers and served as a chorus. The usual procedure was for the men to sing and dance their way from the nearby forest into the plaza, where they were joined by the female chorus. They then made the rounds of all the houses, pausing to sing at each.

Only Matiwana and Nitvary served as leaders of the dance processions, as they had inherited the necessary songs. Makurawa also knew *ole* songs, but his role was always secondary. Nitvary, due to his youth and vigor, was the principal dance leader. Most of the other adult men did not participate in the dances and seemed bored by the activity at times. There was no rule governing female participation in the dance. One of the men initiated the performance without consulting the other men, and the women flocked from their houses of their own will to join the procession, falling in behind the older boys. Quain thought this reflected well the respective roles of the men and women in Trumaí culture. Children always followed in the rear and cried out at the beginning and end of each major sequence in the performance.

There were also *ole* songs for solo performance without choral accompaniment, which were not considered to be the special property of any one man. The soloist made the rounds of all the houses, stopping at each to perform a song and a simple dance. Even the women sang certain *ole* songs, and on one occasion Quain observed two women making the customary rounds together without male accompaniment.

Quain mentioned one song as being quite melodious, and stated that there was greater variation of pitch in songs which were distributed throughout the upper Xingú area. The Trumaí had borrowed songs heavily from their neighbors, and, in fact, had probably borrowed the whole ceremony. Kamayurá verses were most frequently heard, but there was also a significant sprinkling of Cariban words.

The chorus that followed Matiwana and Nitvary gave only the sketchiest accompaniment. The women did not seem to know the songs,

1:Murphy and Quain E-4,5 (1938) 1955
SP23 Trumai SP23

but the frequent repetitions and the small number of pitches made accompaniment possible, and their voices fell consistently into the fourth interval below those of the men. The women, however, enjoyed their role thoroughly and gave far better support than the men, who made little effort to coordinate their activities. 796 243 533

The songs were arranged in a series of three verses. Each time a new house was entered, the singer started a new series. Matiwana's songs were more elaborate than Nitvary's. Occasionally the old man would make a mistake and have to start the verse over again, but these lapses merely amused him. The only musical instrument used was the tapir hoof rattle. [534]

Quain gives no detailed information on the dances involved, but apparently they were simple, and perhaps partially improvised. Nitvary was the sole person to take special pains with his toilet before leading a dance. At such a time he usually wore a feather headdress and painted his body ornately. [535] [302]

One of the more important parts of the *ole* ceremony was the complex of activities surrounding the *ole* posts. A few days after the ceremony began several poles were brought into the clearing just outside the village, and the bark was peeled from them. They were rubbed with white clay and painted in colored designs. Each man placed the pole he had decorated upon his shoulders and brought it into the village with shouts and singing. With the poles on their shoulders, they danced about the village, finally placing their burdens upright in holes that had been dug previously in the village plaza. The children helped by packing dirt around them. The women then smeared red *urucú* dye on the bases of the poles and just below the upper ends. Tufts of cotton were put on top by both men and women. An offering in the form of fish on *beiju* was placed in front of the posts. Later in the afternoon, and early every afternoon for the next two weeks, the men ate together among these poles. Their attitude in this ceremonial milieu was certainly not one of special reverence, for they draped two blankets Quain had given them over the posts for shade. 796 243 [386] [782]

Nearly every day additional food offerings were placed in front of the posts. One post was given special attention. This was Nukekerehe, which was said to be malignant. However, fear of Nukekerehe was mixed with jokes. Quain was told one night that the men would not go to bed until he did, for if he stayed up long Nukekerehe would surely eat him. Weeks later, when the posts were pulled up and brought into the houses of their owners, the man carrying this pole stamped his feet at the children and pretended anger, much to everyone's amusement. On one occasion Matiwana performed a ritual in which he was apparently acting the part of Nukekerehe. He made wrathful noises and jumped about in front of the post, before which were two bowls of manioc soup. [782] 796 243 522 [247]

Jakwanari then presented to the dancers as payment. In another part of the ceremony, a gourd of the *piquí* fruit drink was poured on Jakwanari in the same manner that the manioc gruel was poured on Matiwana during the *ole* festival.

The Spear-Throwing Contest

The spear-throwing contest involved intertribal participation and was completely secular. The core of the celebration, which took place at the end of the rainy season, was a duel between rival teams representing the tribes of the area. The purpose of the duel was for a member of the team on the offensive to strike a member of the defending team with a blunt-ended spear propelled by an *atlatl*, or spear-thrower. The defendant held a few sticks vertically, one end resting on the ground, and tried to deflect the oncoming spear with them. The distance between the two was about twenty paces and hits were frequently scored. After each turn, the defender went on the offensive. The games were conducted in a spirit of friendship and festivity. Bruises, some of which must have been severe, were compensated for by gift exchanges.

The participants painted their bodies elaborately for the combat. One informant erroneously stated that the masks for which the area is famous (but which were no longer made by the Trumaí) were worn during one part of the festival.[7] Intertribal wrestling matches were also held at this gathering.

The Bull Roarer

Information on the defunct bull roarer rites, as for other ceremonies, is extremely meagre. As the Trumaí express it, they have "buried the *kuth*" (bull roarer), but most of the adult men knew the ritual connected with it and remembered when it was still in use. The Trumaí formerly went to the Kamayurá village and took part in the ceremony there. One man told Quain that dancing in the Trumaí village preceded the ritual, whereupon they all went to the Kamayurá village and "did things that the women cannot see." Then, he said, there was a great deal of wrestling and copulation. Yati, Maibu, and Tun played a ceremonial role known only to them, while Yati, Oirupa, and Nitvary sang certain songs at night when everyone was asleep. The ceremonial flutes found throughout the upper Xingú are not mentioned in Quain's notes. Apparently, they were no longer used by the Trumaí.

[7] These masks are worn during a ceremony called the *jakui* by the Kamayurá, which, according to Galvão (1960, p. 355.) takes place in the same season, thus explaining the confusion.

1:Murphy and Quain E-4,5 (1938) 1955
SP23 Trumai SP23

526 would be terminated by mutual consent and without the need for either
[157] contestant to concede defeat.[5] The wrestlers were often pushed around considerably, but except for grunts of effort, there were no expressions of pain or anger. However, when Quain tried to teach the Trumaí men to box, even the lightest punch caused them to retire. They claimed that the *karahiba* sport was much too rough.

562 Trumaí women do not "know how" to wrestle, but the Kamayurá
526 women wrestled to entertain guests. It was common opinion in the region
186 that Trumaí women did not compare favorably with Kamayurá women.
648 Even the Trumaí men agreed on this point. After a visit to the Kama-
171 yurá village, the precocious young Yanahí was vociferous in his approval of them. His admiration was due chiefly to the *jamyrikuma*, a Kamayurá female song and dance in which the women flapped their breasts and went through other provocative motions. He also described how they had pushed their twine belts down low on their buttocks, which to him was a very suggestive act. After the dance the women wrestled. Jakwalu, a Mehinaku, was the only woman in the Trumaí village who could wrestle, a fact that suggests that the females of this group also practiced the sport. She demonstrated her ability only on intertribal visits.

574 The Trumaí women did not entertain guests, except insofar as visitors
535 forced their attentions on the unmarried ones. The only occasions on which they were known to sing and dance were at certain ceremonies when they served as a chorus to the men.

533 Except for the use of pan-pipes, which the men played in the morning,
[534] all music was connected with religious ceremonial. The pan-pipes con-
[196] sisted of a half-dozen hollow reeds of different lengths laced together. Ceremonial singing was melodious, and the Trumaí enjoyed singing. They frequently requested Quain to sing in the men's circle. The requests were always phrased on behalf of the women and children.
[123] Visits from members of other tribes always called for a performance by the ethnographer.

522 Humor consisted mostly of practical jokes played at the expense of
571 others. Jokes were always perpetrated by the men; the women served occasionally as butts. This does not mean that the men were gayer or more light-hearted than the women, for the contrary was actually the case. The women enjoyed each other's company more. They gossiped and laughed together, worked together, and generally wore a pleasanter expression. For the men, jokes were important as a means of recognition and assertion. They were always performed for an audience.

Teasing the women was also a popular male diversion. This was often done by ignoring them completely during a conversation. Yati was a

[5] This may be true only of bouts between Trumaí, as Oberg (1953, p. 59) notes that a man is defeated when he is thrown on his back.
